Detailed Action

Response to Amendment

Claims 1-2, 4-6, and 8-21 are pending. This action is in response to the amendment received April 4, 2005.

Response to Arguments

Applicant's arguments filed April 4, 2005 have been fully considered but they are not persuasive.

In response to the arguments concerning the previously rejected claims the following comments are made:

The rejection of claims 1-2, 4-6, and 8-21 under 35 U.S.C. 102(a) or (e) as being unpatentable over Justice et al. (US publication no. 2003/0174823) is maintained.

Re claim 21, Justice teaches detected suspicious activity is that the transaction velocity has exceeded the predefined velocity limit (page 8, sections 0095; page 3, 0037-0039; fig. 10). In other words, Justice detects a transaction velocity exceeded the predefined velocity limit when he discloses the rate of changing transactions in a database customer account exceeds a predetermined threshold.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., different issuers) are not recited in the rejected claim 16. Although the claims are

Art Unit: 3624

interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In addition, Applicant alleges that the prior art made of record fails to teach different issuers. The examiner disagrees with applicant's representative since Justice teaches different issuers (page 2, 0027; page 3, 0047; figs. 1 and 9). In other words, Justice teaches in figures 1 and 9 about different issuers when there is a plurality of issuers.

With regards to the claims rejected as unpatentable over Justice, the examiner would like to point out that the primary reference teaches the claimed limitations and thus provides adequate support for the claimed limitations. Therefore, the examiner maintains that Justice anticipated the claimed limitations.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
